MasterGraphics to Focus CAD Solutions on Architecture, Engineering and Construction Industry

Manufacturing Division Acquired by D3 Technologies

Madison, Wis., May 8, 2017 – The manufacturing division of [MasterGraphics Inc.](http://MasterGraphics.com), a leading provider of technology solutions, was acquired by D3 Technologies, based in Springfield, Missouri, in a strategic move to allow MasterGraphics CAD Solutions Group to dedicate itself to the architecture, engineering and construction (AEC) industry.

“Currently, our CAD Group has two separate divisions, one dedicated to the building industry and the other to manufacturing,” said MasterGraphics president and CEO Michael Wilkes. “This strategic decision was made so we can focus our Autodesk® CAD Solutions Group exclusively on architecture, engineering and construction **allowing us to even** better serve our clients in the building industry.”

As part of the transition, MasterGraphics will invest in a wider and deeper range of services that will enable the company to approach broader AEC and civil segments.

“We are committed to remaining the trusted leader in providing Autodesk CAD solutions to the building design, **civil** and construction space throughout the Midwest and beyond,” Wilkes said. “I am confident that our manufacturing **CAD** clients will be in great and capable hands with D3.”

The other two divisions within MasterGraphics, its Imaging Solutions Group and StudioMGI, remain unchanged. **They continue to serve both the AEC and manufacturing sectors.**

“Our Imaging Solutions division will continue providing wide-format printers, 3D printing and 3D scanning solutions, while our expanding StudioMGI team will continue to offer visualization services that include technical animations, 3D scanning, instructional design services, and virtual reality solutions,” Wilkes explained.

About MasterGraphics

MasterGraphics is one of the Midwest’s leading providers of technology solutions for architecture, engineering, construction, **manufacturing** and civil industries and is headquartered in Madison, Wisconsin, with offices in Milwaukee, Appleton, Chicago and Minneapolis. Serving as a trusted advisor to its clients, MasterGraphics helps to streamline design data throughout its customers’ entire process. For more information, visit www.mastergraphics.com.

About StudioMGI

StudioMGI is a team of technologists, designers, architects and engineers dedicated to harnessing the power of cutting edge 3D **visualization**, printing, and scanning and **technologies**. It combines industry-leading technical and creative expertise with a deep understanding of architecture, engineering, construction and manufacturing.
